Re: Annual Report for the Year 1993, Prophecy #2 & #4,  
S/049/015, Utah County, Utah

Dear Mr. Mills:

Thank you for your response to our request for the 1993 annual report for your Prophecy #2 and #4 mining operation. Your response stated that there were too many regulations, that you closed out your claims and the site was no longer active. We appreciate this response; however, your site has been active in the past and we still need to have your report stating what activity, if any, took place during 1993 or until you closed out your claim and the site became inactive. Our files indicate that this site involves mixed surface and mineral ownership by the BLM, USFS and State Lands and Forestry.

Have you performed any reclamation at this site? If so, please describe any work done. If no reclamation has been performed, please explain why.

A Division staff member will need to inspect the site before you can be released from any further reclamation responsibilities. We will contact you before making the inspection and invite you to accompany us if you would like.

Thank you for your cooperation and prompt attention in submitting the required information. An annual report form (MR-AR) is enclosed for your use.

Sincerely,

Anthony A. Gallegos  
Reclamation Engineer
